

START RECYCLING

We are a group of high schoolers with a passion for the environment, and we hope to educate people on how to live a cleaner life, especially in our schools. One of our main goals is to have successful and productive recycling programs in schools across the state. Unfortunately, it is not easy to establish one without the right resources and knowledge. This is where we can help! Here are some steps YOU can take to start recycling at your school!

1. COMMUNICATE with your school administration, teachers, and friends about possibly starting a recycling club in your school.
2. RESEARCH about costs, location of your nearest recycling center, and what and what not to recycle.
3. ORGANIZE a group of students to help figure out the logistics of the club, such as membership, meetings, etc.
4. START RECYCLING!

OUR MISSION

The mission of the Alabama Environmental Youth Council is to promote environmental sustainability, educate others on environmental issues, and advocate for a healthier, greener Alabama. This program hopes to encourage recycling within the schools of Alabama.
